GLOSSARY

Institution: Entity affiliated to the Spanish academic and research network (Red), which, by signing this document, agrees to comply with the Affiliation Agreement and the Acceptable Use Policy which it was sent along with this information and which are available at:

<http://www.rediris.es/rediris/instituciones/afiliacion.html>.

The institution may be affiliated without being permanently connected to the trunk network of RedIRIS. The RedIRIS connection can be made directly to a RedIRIS node or, indirectly, through another affiliated entity or, where appropriate, the academic and scientific network of the autonomous region in which the institution is located.

The institution may register those centres which form part of it, or which are dependent on it, with the RedIRIS database, where, given their characteristics, it is desirable for them to appear in the database in addition, in order to have certain contacts of their own which receive communications from RedIRIS directly. It is particularly desirable for those centres of an institution with a very different location (e.g. in a province other than that of the main office of the affiliated institution) to be registered, as, in such cases, certain service notices which do not affect the main office may be relevant to those centres. In any event, the centres appear as dependent on the main institution, whose PER acts as the contact person with RedIRIS for both the institution itself and all of the centres belonging to it.

Contact person (PER): Contact person for the institution with RedIRIS. Technical or administrative figure chosen by the affiliated institution to act as a go-between with RedIRIS. This person will receive information, notices, announcements, etc., sent from the academic network, and will be responsible for distributing them to users at its institution, as he or she sees fit. It is the person who channels the service requests of the institution's researchers to RedIRIS, as well as organising their participation in forums, working groups, technical conferences, etc., organised by RedIRIS. He or she is the contact in the IRIS-PERS distribution list and the person who signs and accepts the terms of use of the services on behalf of the institution. He or she must respond diligently to any requests sent by RedIRIS for service coordination purposes.

Security contact person (SCP): Technical contact person, chosen by the affiliated institution, to act as a go-between with RedIRIS in relation to security matters.

Network contact person (NCP): Technical contact person, chosen by the affiliated institution, to act as a go-between with RedIRIS in relation to network (Red) matters.

Basic Data Protection Information

Data Controller	Public Corporate Entity Red.es, M.P.
Purpose	Management of the services requested from Red.es.
Legitimate basis	Maintenance of the contractual relationship between the entity in which the contacts provide their services and Red.es.
Recipients	Data will not be transferred to third parties, unless required by law.
Rights	Access, rectification and erasure of data, as well as other rights as explained in the additional information.
